

Social Apps for Transport

Andrew Nash

GreenCityStreets.com

October 2, 2013

1. Why?

We know about sustainable transport.

Residents ...

... know their neighborhood.

... provide political support.

... have creative ideas.

... are willing to do things.

... care.

Social apps link:

Users  **Producers**

Residents  **Agencies**

2. How?

Inform

Inform + Consult

Inform + Consult + Collaborate

In reality: a continuum.

Starting from:

- Static web pages.**
- Facebook pages.**
- YouTube channels.**
- Twitter.**

Leading to:

- Reporting apps.**
- Discussion apps.**
- Educational apps.**
- Action apps.**

Citizens Connect App

The Citizens Connect mobile app helps residents make their neighborhoods even better. The app, which works on Android phones and iPhones, makes helps constituents report potholes, graffiti and other service issues. We encourage you to download the app or take a look at some of the recently reported issues.

GreenCityStreets ... Facebook-based collaboration app

About

The KROSS/walk project wants your input on locations in Downtown Brooklyn and the surrounding neighborhoods.

Tell us about the safe intersections that make your walking and biking trips better, and tell us about the unsafe intersections that make your trips worse.

These comments will be mapped and coordinated for Community Boards, local elected officials, our police precincts, to make positive changes and to Make Brooklyn Safer! The maps will also be useful to help choose routes when traveling on a new street or on the different path.

In trying to find a healthy and safe alternative to getting our kids around Brooklyn, we have found that making our local trips on bike and on foot allows for our kids to be part of the movement, literally. Brooklyn kids are on the streets getting to and from school, activities, sports, and parks. Brooklyn kids are meeting and greeting each other, and our streets are the places to meet, or the place in between it all. Brooklyn kids know the rules of the road, (cars rule!) and we would like to mix it up with your help. We all have our own routes that work for us, and there are routes we avoid. As a community we aim to make our streets safer by pointing out problems that concern us, as people who ride/walk/travel with our kids. You don't have to have kids to care about their safety.

Shawn identified an Unsafe Intersection

Hilda identified an Unsafe Intersection named DeKalb & St. Felix

Frank identified an Unsafe Intersection named Adams at Fulton Mall

Someone identified an Unsafe Intersection named Flatbush & Tillary

Doug identified an Unsafe Intersection named Butler & 4th Ave.

Frank identified an Unsafe Intersection named Adams & Willoughby

Frank identified an Unsafe Intersection named Adams & Willoughby

Joan Oleck identified an Unsafe Intersection named St. Johns Place & Plaza St. East

Anthony identified an Unsafe Intersection named Havermeyer & S. 4th

Add GPS

What's Street Bump?

Street Bump is a crowd-sourcing project that helps residents improve their neighborhood streets. Volunteers use the Street Bump mobile app to collect road condition data while they drive. The data provides governments with real-time information to fix problems and plan long term investments.

[Learn More](#)

Where is Street Bump being used?

1,837 trips recorded, 102,506 bumps detected

17 bumps reported in Boston, Massachusetts about 15 hours ago

Improve Public Transport!

A traffic signal allows this Zurich tram to go ahead of private vehicles. (Source: Andrew Nash, 2002; click on photo for flickr group photos).

1. Introduction

This wiki presents recommendations for making public transport more attractive to customers and efficient to operate. Recommendations focus on relatively simple and inexpensive improvements that can be implemented quickly rather than more expensive and complicated measures like building new rail-based systems (we leave these improvements to other web pages).

2. Recommendations

To improve public transport in your city:

1. [Speed-up the vehicle boarding process](#). How?

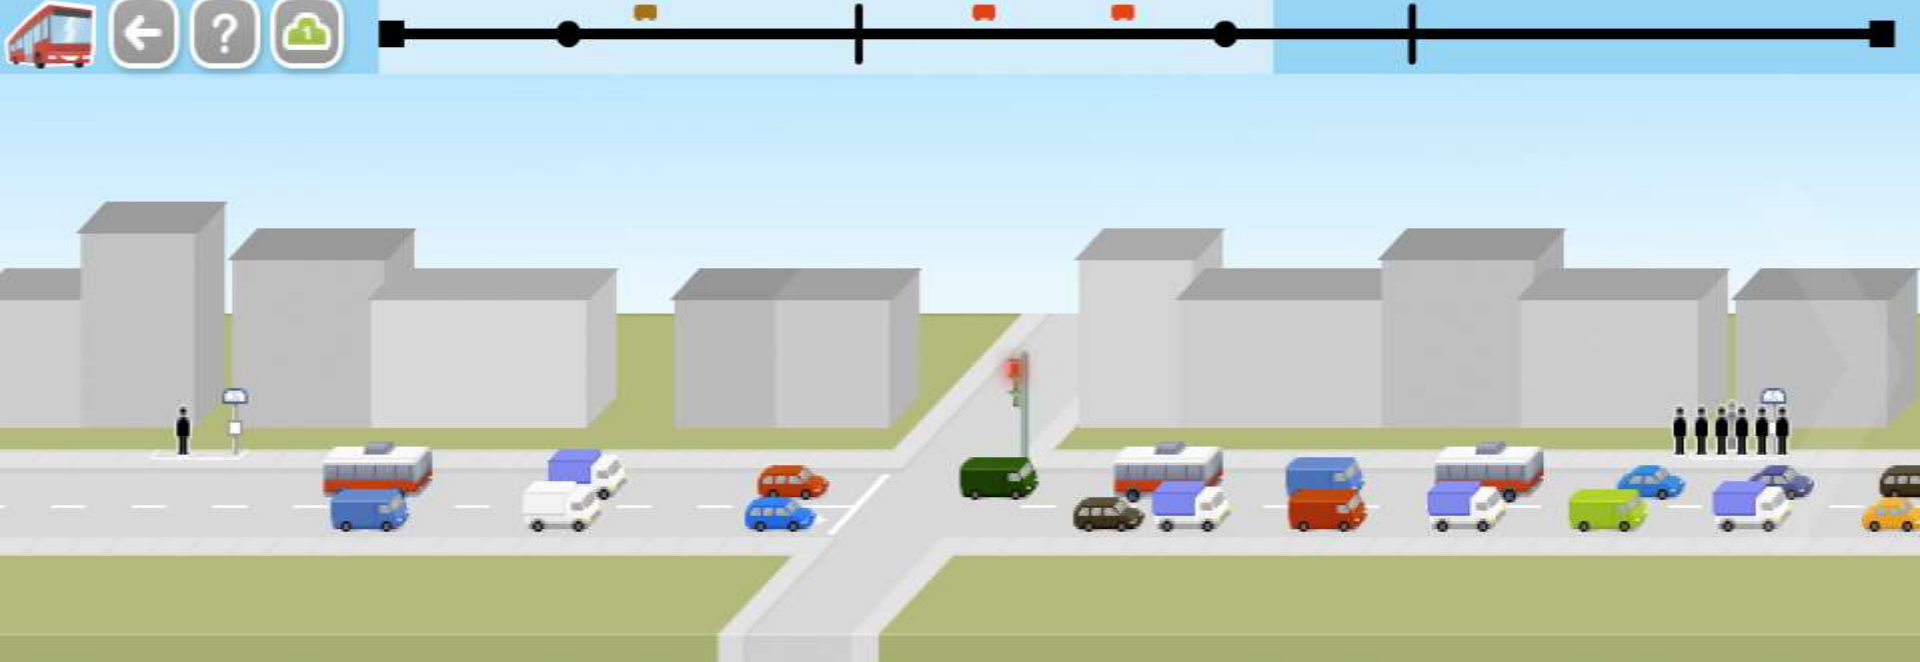

- Use proof-of-payment fare collection;
- Use low floor vehicles;
- Improve vehicle design;

2. [Optimize station placement](#). How?

- Reduce the number of stations/stops;

Statistics

Happiness Costs More

Σ Total

A line graph showing the 'Happiness' metric over time. The y-axis is a vertical scale from a red sad face at the bottom to a green happy face at the top. The x-axis represents time. The graph shows a blue line that starts at a high happiness level, then gradually declines, reaching a low point before slightly recovering. A white play button icon is positioned at the end of the graph line.

Featured project

Ripon Christmas Lights - Phase 1

North Yorkshire

We want to bring the festive atmosphere to Ripon by adorning our iconic city centre with an artistic classical display of pure white illuminations.

Pledged	Goal	Days left
£3,014	£9,606	6

What people say

We've got exciting plans to turn a local crime black spot into a friendly performance space for musicians and artists. Spacehive helps us reach a really broad mix of supporters - as well as raising the money to get the project built. The result will be somewhere people feel they own.

Emma Dyer, Project Promoter,
The Magic Roundabout, Bristol

Other interesting projects ...

Unlock London's secret dock

Greater London

We're using people power to transform a derelict dock into a thriving waterside community with epic views of London. Please pledge

Play therapy room make over

Greater London

We would love to refurbish our much loved and used play therapy room in order for it to be more functional and more resourceful space.

Make Mansfield YOUR hotspot!

Nottinghamshire

Help us launch a new era for shopping in Mansfield with FREE Wi-Fi. Surf the net, keep in touch with friends, access instant shopping

Whitaker Park Picnic Area

Lancashire

We have access to a disused animal enclosure which we would like to build into a family picnic area.

1. Why?

Data is the future.

**If we have the data,
we have the power.**

Vienna ...

... do we need something?

... what, exactly?

... how can we build it?

... who wants to work on it?
