

Journal of Transport & Health

Now listed in Thomson Reuters' Social Sciences Citation Index from Volume 1 and the European Reference Index for the Humanities and the Social Sciences!

The Journal of Transport & Health is devoted to research on the many interactions between transport and health. These include, for instance:

- the various impacts of transport on public health and inequality
- road danger and its reduction:
- factors affecting transport choices:
- synergies between sustainability and health impacts of transport;
- economic and health impact assessments;
- and policies that promote or discourage healthy and sustainable transport modes, transport systems and communities.

The journal aims to cover transport and health issues in all countries. Three particular aims of the journal are: to promote dialogue between the two research communities it serves; to improve the quality of data and the appropriate use of data; and to encourage transfer of research into practice.

Editorial Team

Editor in Chief

Jennifer Mindell

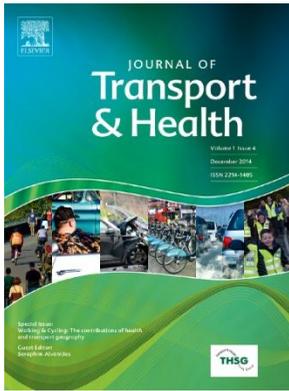

UCL, UK
