### Objectives

The CIVITAS training will offer hands on insights to local and regional authorities, businesses and NGOs having a stake in Access Management schemes in inner city areas. It will enable practitioners to design effective packages of measures in the triangle Engineering, Enforcement, and Incentives.

After this training participants will:

- Know the characteristics of different Access Management measures.
- Have insights in practices of European cities in implementing Access Management schemes.
- Be able to apply them to a specific context.

### How to prepare?

- Think about a city (eg. your own city) for which you could set up an urban access management scheme.
- Visit <http://urbanaccessregulations.eu> and explore European practices. What strikes you?
- Follow the CIVITAS e-course: ‘Traffic and mobility – Fundamentals’ available at [www.civitas.eu/learning-centre/e-courses](http://www.civitas.eu/learning-centre/e-courses)
