MULTIMODAL MOBILITY HUBS AND LAST-MILE DELIVERY

Friday, 18 February 2022 @ 11:00 - 13:00 (CET) | Online

Multimodal mobility and logistics hubs provide a smart point in the transport network that seamlessly integrates different modes of transport with logistics flows.

By combining public or collective transport stations, car-sharing parking slots, bike-sharing docks, EV-chargers, or public cargo bike-sharing platforms and integrating this offer with drop-off and pick-up delivery solutions, multimodal hubs can play an important role in the transition towards zero-emission urban mobility and logistics.

Join us on 18 February 2022 to discover the multimodal hubs landscape, deep dive into logistics operator needs, and learn more about two city approaches to multimodal hubs and last-mile delivery.

The full agenda for the webinar is available below.
