About CIVITAS PORTIS

5 EUROPEAN PORT CITIES. 5 LIVING LABORATORIES, 49 INNOVATIVE SOLUTIONS FOR MORE SUSTAINABLE URBAN MOBILITY.

Port cities deal with some unique challenges, from getting cruise ship passengers to the city centre, to routing truck traffic, to docking ships. Within CIVITAS PORTIS, five geographically, culturally and climatically diverse port cities in Europe - Aberdeen, Antwerp, Constanta, Klaipeda and Trieste - are currently implementing Innovative and sustainable urban mobility solutions.

The Civitas Portis Framework and core strategies

In the CIVITAS PORTIS cities, the improvement of governance for an enhanced cooperation between cities and ports and all other important stakeholders, in combination with integrated data platforms, is the framework for the planning and implementation of innovative mobility solutions and integrated land-use structures. The SUMP of the port cities are extended integrating the traditional SUMP (Sustainable Urban Mobility Plan) and the interacting SULP (Sustainable Urban Logistic Plan) themes with the ports as well as relevant regional aspects. A strong involvement of people and stakeholders is required throughout the process.

New concepts of car-less lifestyles are implemented with collective and active modes, allocating road spaces in a more efficient way, introducing and improving sharing systems and raising awareness on alternative mobility solutions.

The shaping of a more integrated transport infrastructure and mobility systems, which in turn attract residents and diversified economic activities, is increasing the accessibility

and the quality of mobility through regulation, intelligent management of traffic, and the uptake of alternative vehicles and fuels.

The improvement of the efficiency of urban freight transport is particularly relevant in port cities reducing the environmental and congestion footprint of freight movements within the city and between city and port.

Portis City-2-City Cooperation Programme

After more than two years of preparing, testing and implementing innovative mobility measures, the 5 Portis-cities are ready to share their knowledge and show their insights. Dedicated experts in the 5 Portis-cities will transfer the most useful innovations to other port cities and marketplaces, so that port cities around the world, as well as other types of cities that are major transport nodes and attractors, can benefit from these mobility solutions.

Do you want to get a unique insight in our mobility solutions? Pair up with one of our pioneering port cities and apply for the City-2-City Cooperation Programme!

Benefits of the Portis City-2-City Cooperation Programme:

- Personalised/tailored to your needs/most pressing mobility issues
- Valuable insights on the innovative mobility measures
- Find solutions through the exchange of technical and managerial know-how
- Key success factors for implementation and most important barriers
- With cities alike / coping with similar mobility challenges
- ‘Behind the scenes’ experience: peer-to-peer; experts-to-experts
- Support to draft of an operational plan to implement a CIVITAS PORTIS -like mobility measure to your city

Who can apply?

All **EU Port cities** who...

- Are challenged by complex mobility issues
- Want a deeper understanding of the most successful PORTIS mobility measures
- **Are committed to draft an operational plan for the implementation of one of the PORTIS mobility measures based on the insights of the Portis City-2-City Cooperation Programme**

APPLICATION PROCESS:

3-step application process:

- (1) Send us your intention of interest, and we send you more information on the specific strategies and measures in the CIVITAS PORTIS cities and the way to apply to participate in this cooperation program - fill in the table below and send it to portis@tmleuven.be **before 15 September 2019**:

Intention of interest

- Yes, I'm interested to get more information on the Portis city-2-city programme:
- City:
- Name:
- First name:
- Position:
- E-mail address:
- Phone number:

- (2) Apply for the cooperation program by filling in the application form which will be sent to you by the Portis cooperation team and mark your top 3 mobility measures - before 1 October 2019
- (3) The PORTIS-cooperation team will get in touch with you and have an in-depth interview to link your challenges with those of one of the 5 Portis-cities

Agreement on the cooperation – before 1 December 2019

Core elements of the actual COOPERATION process:

- (1) Exploration of transferability potential of the CIVITAS PORTIS-city through interactive telco's with experts of your city
- (2) Technical visit and working meetings in your PORTIS partnering city*
- (3) Draft of the operational implementation plan

***Cities that take part in the City-2-City cooperation programme can have the travel cost of 2 people reimbursed by Civitas Portis. (up to € 750/pp)**
