

Mobilna Gdynia Platform

CiViTAS
“quotes”

“ The city conducted an **online survey** on the closure of one of the main streets for traffic using the **internet platform** established in 2014

More than **2,700** people completed the questionnaire (viewed by over **7,000** people)

Some **73%** of respondents agreed to limit car traffic on the street and more than **60%** (out of **2,700**) also agreed on closing the street for traffic

Around **200** traditional interviews supplemented the survey to reflect the less “technologically active” target groups
